1. GRAPE SETTINGS

Grape stores internal settings in the table grape.setting. The following functions can be used to read and manipulate these settings:

1. *grape.set_value (**name** TEXT, **value** TEXT)* - sets the value of setting **name** to **value**
2. *grape.get_value (**name** TEXT, **default_value** TEXT)* - returns the value of the setting **name**, or if it does not exist returns **default_value**
3. *grape.setting (**name** TEXT, **default_value** TEXT)* - alias for *grape.get_value (**name** TEXT, **default_value** TEXT)*

1.1 Known Grape settings

NAME	DESCRIPTION	DEFAULT VALUE
hash_passwords	Indicate whether passwords in grape.user is hashed	false
